
Page 1: Affirmation Display and Basic Layout

Task Title: Design the Affirmation Display Layout

Description:

- Design the main affirmation display for the app, which shows one affirmation per day. This page will focus on the layout and text styling.

Details:

1. **Background:** Set the background to **#FFF0E1** (light peach) for a warm, welcoming feel.
2. **Affirmation Text:**
 - Display the daily affirmation in **Arial Italic**, **size 20px**, and **#2F4F4F** (dark slate gray) for readability.
 - Center the affirmation text on the page for a balanced, focused appearance.
3. **Affirmation Display:**
 - Include an area that will dynamically display the affirmation for the day.
 - Ensure the space is clean, with ample margins to avoid crowding the text.

Deliverables:

- HTML structure for the daily affirmation display.
- Basic CSS to style the affirmation text and background.

Budget: \$5

Page 2: Save Button and Favorites Functionality

Task Title: Design the Save Button and Favorites Feature

Description:

- Design the "Save" button that allows users to save their favorite affirmations, and provide a system for users to access these saved favorites.

Details:

1. **Save Button:**
 - Place a prominent **Save** button below the affirmation, styled in **#FF7F50** (coral) to draw attention.
 - The button should allow users to save the current affirmation to their favorites.

2. Favorites List:

- Add a function to view saved affirmations later. Create a simple link or button labeled "View Favorites" that leads to a page showing saved affirmations.

3. Interactive Design:

- Upon clicking "Save," change the button text to “**Saved!**” for user feedback.
- Consider adding hover effects to the button for a responsive feel.

Deliverables:

- HTML structure for the Save button and favorites functionality.
- CSS for button styling and hover effect.

Budget: \$5

Page 3: Responsive Design and Mobile Optimization

Task Title: Ensure Responsive Design and Mobile Optimization

Description:

- Make sure the daily affirmation display and the Save button function well on different screen sizes, especially mobile.

Details:

1. Responsive Layout:

- Use **media queries** to ensure the affirmation text remains legible and centered on smaller screens.
- The Save button should adjust in size and position depending on screen size to ensure it remains accessible.

2. Mobile View:

- On mobile devices, the affirmation should scale to fit the screen without losing readability, and the button should be easy to tap.

3. Visual Simplicity:

- Ensure the interface maintains its simple, warm feel while adapting to various devices.

Deliverables:

- HTML and CSS to ensure mobile-responsive functionality.
- Media queries and adjustments to ensure text and button visibility on smaller screens.

Budget: \$5
