
Page 1: Task List and Add Task Functionality

Task Title: Design the Pet Care Task List and Add Task Interface

Description:

- Design the task list where users can view and manage pet care activities. Include an **add task button** to allow users to input new tasks.

Details:

1. **Background:** Set the background color to **#F8F9FA** (light gray) for a clean, neutral canvas.
2. **Task List:**
 - Display tasks with **task titles** in **Arial Bold, 16px**.
 - Each task will have an option to mark it as **completed** or **in progress**.
 - Tasks should be clearly organized with space for both upcoming and completed tasks.
3. **Add Task Button:**
 - A prominent **button** for adding new tasks should be displayed, styled in **#FF6347** (tomato red) to draw attention.
 - The button should open a form to input task details, such as task name, date, and reminder frequency.

Deliverables:

- HTML structure for displaying the pet care task list and add task button.
- Basic CSS for styling the list and add task button.

Budget: \$5

Page 2: Task Reminders and Notifications

Task Title: Design the Reminder and Recurring Task Interface

Description:

- Design the reminder system to set notifications for recurring pet care tasks like feeding, grooming, and veterinary visits.

Details:

1. **Reminder Functionality:**
 - Include options for setting **reminders** for each task (e.g., feeding every day at 8 AM).
 - Allow users to toggle between recurring task options (daily, weekly, monthly).
2. **Task Sections:**
 - Different sections or tabs should visually separate tasks by category, such as **feeding**, **grooming**, and **veterinary visits**.
 - Use **#8A2BE2** (purple) for section titles to add playfulness and clarity.
3. **Reminder Notification Icon:**
 - Display a notification icon next to tasks that have active reminders, ensuring users can see upcoming tasks.

Deliverables:

- HTML for adding reminders and categories to the task list.
- CSS for styling the reminder icons and task sections.

Budget: \$5

Page 3: Task Overview and Mobile Responsiveness

Task Title: Design the Task Overview and Ensure Mobile Responsiveness

Description:

- Create the overall task overview interface where users can easily track their pet care activities, ensuring mobile responsiveness for clarity on different screen sizes.

Details:

1. **Task Overview:**
 - Design a clean and organized layout that presents upcoming, completed, and recurring tasks clearly.
 - Include a **progress tracker** for tasks with a percentage of completion, especially useful for tasks like grooming or veterinary visits.
2. **Mobile Responsiveness:**
 - Use **media queries** to make sure the task list, reminder system, and task sections display well on mobile devices, adjusting layout for smaller screens.
 - Tasks should remain clear, with buttons and notifications scaling appropriately.

Deliverables:

- HTML for the task overview layout, including progress tracking and reminders.

- CSS for mobile-responsive design, ensuring the interface is accessible on smaller devices.

Budget: \$5
