General Description

You will **create** the final, fully **accessible** design library. Check each component (buttons, forms, nav links) for color contrast (≥4.5:1 for normal text), define focus rings, and suggest ARIA usage (e.g., `aria-label` for icon-only buttons). Provide a single board or PDF with updated components states (default, hover, focus, disabled), ensuring the brand from UI/UX #1 is still consistent.

What the Freelancer Needs / Requirements

- **Design Tool**
  - Figma, Sketch, or Adobe XD.
- **Contrast Checking**
  - Tools like Stark or manual ratio checks.
- **Focus & Hover States**
  - Show how each interactive element changes on hover or tab focus.
- **ARIA Guidance**
  - Short notes like "Use `aria-label` for close icons," or "Role=dialog for modals."

Task Description

1. **Task 1**
   - **Audit Existing Components**
     - Buttons, forms, nav, text to ensure color contrast is adequate.
     - Identify any fails and choose new color shades if needed.
2. **Task 2**
   - **Redesign or Update**
     - Provide final versions of each major element with focus outlines, hover states, etc.
     - Add bullet points for ARIA usage if relevant.
3. **Task 3**
   - **Assemble Final Library**
     - A single doc or Figma page with updated components.
     - Indicate recommended code-level changes for focus, e.g., "2px border in brand accent color for focus."
   - Export or share with the dev team.

Job Profile

UI & UX Web Designer
