Bakery Website

I am looking for a simple and visually appealing bakery website that includes the following elements:

1. **Navigation Bar:**

   - **Contains links to key sections such as Home, Products, About Us, and Contact.**

   - **Should be fully responsive and work seamlessly on all devices.**

2. **Product Cards:**

   - **Each product (e.g., cakes, bread, pastries) should have a card displaying:**

     - **A high-quality image.**

     - **Product name.**

     - **A short and engaging description.**

3. **Short Description Section:**

   - **A brief section highlighting the bakery's story, values, and what makes it unique.**

4. **Location Section:**

   - **An interactive Google Maps embed showing the bakery's exact location.**

   - **A detailed text address for easy navigation.**
