

## General Description

You will create wireframes and mockups for two pages:

1. The **Home page** to display clothing, including promotional offers (like "10% off first order" and "Free delivery on orders over \$25").
2. The **Product page** to showcase clothing with product details, including pricing, descriptions, and the ability to add to the cart.

These pages will feature a clean UI/UX design with sections for promotions, product display, and coupon code entry during checkout.

## What the Freelancer Needs / Requirements

- **Design Software:** Figma, etc.
- **Promotion Listing:**
  - A small banner or card for each promotion with a call-to-action (CTA) to apply the promotion or read details.
- **Coupon Entry:**
  - A text field for entering the code, an "Apply" button, and success/fail messages that appear after applying the code.
- **Styling:**
  - Maintain brand consistency (colors, fonts, etc.).
  - Keep the design clean and intuitive, adhering to best UI/UX practices.

## Task Description

### 1. Task 1 - Home Page Design

- Wireframe to display clothing categories and promotional offers on the homepage.
- Option to include a "Deals" banner or a homepage slider with promotional cards.

### 2. Task 2 - Product Page Design

- Showcase individual products with high-quality images, details, and CTA buttons (e.g., "Add to Cart," "View Details").
- Include options for users to select sizes, colors, etc.
- A section to display applied promotions and discounts directly on the product price.

### 3. Task 3 - Coupon Code Entry during Checkout

- Design a coupon code input field during the checkout process.
