Page 1: Item List and Category Organization

Task Title: Design the Item List Layout with Categories

Description:

- Design the layout for displaying grocery items grouped by categories like produce, dairy, and household items. Users should be able to see these items in an organized, easy-to-read format.

Details:

1. **Background**: Set the background to **#FFFFFF** (white) for a clean and minimal look.
2. **Category Headers**:
   - Use **#FF6347** (tomato red) for category headers to differentiate between different sections (e.g., produce, dairy).
   - Ensure category headers are bold and clearly distinguishable.
3. **Item List**:
   - Display grocery items underneath their respective category headers.
   - Use **Arial**, **size 16px** for item names to keep it simple and readable.
   - Leave space for checkboxes next to each item.

Deliverables:

- HTML structure for item list and category sections.
- Basic CSS to style item names and category headers.

Budget: $5

Page 2: Checkbox and Edit/Delete Buttons

Task Title: Design Checkbox Icons and Edit/Delete Buttons

Description:

- Add checkbox icons for marking items as completed, and implement Edit and Delete buttons for each item.

Details:

1. **Checkbox Icons**:

- Style the checkboxes using **#4CAF50** (green) for a visual indication that an item has been marked as completed.
- Ensure checkboxes are clickable and align well with item names.

2. **Edit and Delete Buttons**:
   - Include small, accessible buttons to edit or delete each item. Use icons for clarity: a pencil for "Edit" and a trash can for "Delete".
   - Make sure these buttons are unobtrusive but easily accessible for the user.
3. **Item Interaction**:
   - Add hover effects to the Edit and Delete buttons to improve user experience.

Deliverables:

- HTML structure for the checkbox and buttons.
- CSS to style checkboxes and buttons, including hover effects.

Budget: $5

Page 3: Responsive Design for Mobile Optimization

Task Title: Ensure Responsive Design and Mobile Usability

Description:

- Make the item list, category organization, checkboxes, and buttons responsive for mobile users.

Details:

1. **Responsive Layout**:
   - Use **media queries** to adjust the layout for smaller screens, ensuring the item list remains legible and well-organized.
   - The checkbox, Edit, and Delete buttons should resize appropriately for mobile devices.
2. **Mobile View**:
   - Ensure that category headers remain clearly visible and accessible, even on smaller screens.
   - Items should be easy to scroll through on mobile, with buttons appropriately sized for tapping.

Deliverables:

- HTML and CSS with media queries for mobile responsiveness.
- Adjustments to ensure clarity and usability on various screen sizes.

Budget: $5
