Page 1: Basic Layout and Budget Categories

Task Title: Create Layout and Budget Categories

Description:

- Set up the basic structure for the budget planning interface, including budget categories such as food, rent, and entertainment.

Details:

1. Design a simple, clean layout with a white background (#FFFFFF) for a professional look.
2. Create distinct sections for different budget categories (e.g., food, rent, entertainment).
3. Use charcoal (#4A4E69) for the category headers to ensure readability.
4. Display the category names in Arial Bold, size 18px, for clarity.
5. Ensure the sections are clearly labeled and visually separated for easy navigation.

Deliverables:

- HTML structure for the budget categories.
- CSS for styling the category headers and section layout.

Budget: $5

Page 2: Add Expense Button and Expense Bars

Task Title: Implement Add Expense Button and Expense Bars

Description:

- Add an "Add Expense" button under each category and create expense bars to visualize spending.

Details:

1. Place an "Add Expense" button under each category, allowing users to log their expenses.
2. Style the "Add Expense" button to make it clear and accessible (suggest using a contrasting color).
3. For each category, create expense bars with a dark blue (#1D3557) color to represent the amount spent.

4. The bars should be visually proportional to the budgeted amount.

Deliverables:

- HTML for the "Add Expense" button and expense bars.
- CSS for styling the button and expense bars.

Budget: $5

Page 3: Responsive Design and Summary View

Task Title: Ensure Responsive Design and Add Summary View

Description:

- Make the interface responsive and implement a summary view to track total expenses.

Details:

1. Use media queries to ensure the budget categories are displayed properly on mobile devices, with categories stacking vertically if necessary.
2. Create a summary section at the bottom of the interface that shows the total budget spent versus the budgeted amount.
3. Display a clear indication of how much has been spent in each category, using the expense bars and a simple numerical display.

Deliverables:

- HTML structure for the summary section.
- CSS media queries to ensure mobile responsiveness.

Budget: $5
