Page 1: Basic Layout and Recipe Categories

Task Title: Set Up Basic Layout and Recipe Categories

Description:

- Design the layout for the recipe manager with clear sections for each category: appetizers, main courses, and desserts.

Details:

1. Use cornsilk (#FFF8DC) as the background color to create a warm and inviting atmosphere.
2. Create clear categories for appetizers, main courses, and desserts, each with its own section.
3. Organize recipes by category with a clean layout to easily distinguish each category.
4. Style recipe titles in chocolate (#D2691E) in Arial Bold, size 18px, for readability.
5. Include category buttons that stand out using salmon (#FFA07A) for better visual appeal.

Deliverables:

- HTML structure for the recipe categories.
- Basic CSS styling for categories, recipe titles, and buttons.

Budget: $5

Page 2: Recipe List and Search Functionality

Task Title: Implement Recipe List and Search Function

Description:

- Display recipes within each category and implement a search bar to filter recipes.

Details:

1. List recipes under each category with the title, ingredients, and steps.
2. Include a search bar at the top of the screen to allow users to quickly find recipes by name or ingredients.
3. Ensure the search bar is easily accessible and intuitive.
4. Make sure the recipe list is scrollable for ease of browsing.

Deliverables:

- HTML structure for displaying recipes under each category.
- Functional search bar implementation in JavaScript.
- CSS for recipe list and search bar styling.

Budget: $5

Page 3: Add Recipe Button and Responsive Design

Task Title: Add Recipe Button and Implement Responsive Design

Description:

- Allow users to add new recipes and ensure the design is responsive for mobile devices.

Details:

1. Create an "Add Recipe" button to enable users to add new recipes to the app.
2. Style the "Add Recipe" button to make it prominent and intuitive for users.
3. Use media queries to make the layout mobile-friendly, ensuring that categories, recipes, and the search bar adjust well on smaller screens.
4. Ensure that the recipe list and search bar are easy to use on both desktop and mobile devices.

Deliverables:

- HTML and JavaScript for the "Add Recipe" button functionality.
- CSS media queries for responsive design adjustments.

Budget: $5
